

ZOREL ZRM SERIES egg grading machines are designed for you to classify 36.000 - 60.000 - 70.000 pieces of eggs per hour into 3, 4 and 5 different groups. Transfer of eggs in the most precise and tender manner, low maintenance costs and availability of its spare parts at any time have become always the reason for preference by our customers.

Eggs carried on the band of ZOREL ZRM SERIES egg grading machine are lined up by means of accumulator. Contact between the eggs are avoided when they come to the rollers located at the egg input section. It directs eggs of required weight in grams to the required deck with electronic weighing feature, and offers such options as you can direct eggs of any weight to any deck.

It is designed to make necessary settings easily and provide its users with ease of use by virtue of a feature that it can keep 3 different weight recipe in the memory and improved menus accessible through touch screen display. ZRM SERIES manufactured completely employing local resources, has been put at your disposal, i.e. our customers.

ZOREL ZRM SERIES, based on its compact construction, provides its users with ease of handling and opportunity to work in a limited space, and users can carry out maintenance operations required for the machine without using special tools and equipments, and it allows to replace all parts and facilitates cleaning operations. All parts of our ZRM SERIES grading machine manufactured completely with local resources are produced in our factory and, in this way, it eliminates dependency of users on unstable the foreign sources.

ACCUMULATOR
Eggs supplied to the conveyor from poultry houses are processed by handling eggs in a precise and tender manner with the aid of "ACCUMULATOR", and this ensures operation at very high capacity. Eggs coming from poultry houses are counted and recorded. Accumulator section may be used as pre-selection area.

ZRM-36 YUMURTA TASNİF MAKİNESİ EGG GRADING MACHINE

* Tüm modellerde Tasnif üstü yazıcı,
Karanlık oda ve Toplama Ünitesi opsiyoneldir.

TEKNİK ÖZELLİKLER

- 36.000Yum / Saat max
- Çıkış sayısı : Standart 3 çıkış
- 1. ve 2. kata 1 tasnif grubu 3. kata 2 tasnif grubu toplam 4 grup yönlendirebilme imkanı
- Tasnif gruplarının dokunmatik operatör panel yardımı ile kolaylıkla ayarlanabilmesi
- Dijital Tartım sistemi
- Kolay temizlenebilir yapı
- Paslanmaz çelik yapıda gövde

TECHNICAL SPECIFICATIONS

- 36.000 Eggs / Hour max
- Number of outlet : Standard 3 outlets
- 1 grading group at each of the 1st and 2nd decks and 2 grading group at the 3rd deck, 4 groups of diverting possibility in total
- Easy adjustment of grading groups with the aid of touch screen operator's panel
- Digital Weighing system
- Easily cleanable construction
- Casing made up of stainless steel

Modular roller system ensures to carry eggs in a fast and safe manner...

Thanks to tender separation system, it classifies your eggs into groups without breakage.

Thanks to Accumulator located at the egg input, it lines up the eggs without experiencing any breakages

It ensures faster accumulation by integrating dual sorting systems to wide output bands.

It allows fast and easy classification programming with the aid of touch-screen display.

Thanks to functional printer located at the egg input, so it allows all eggs to be printed.
